LASER PRINTER

MODEL AR-M280U/M280N

[1] INTRODUCTION

These models are a modified version of the AR-M350U/M350N, providing a different printing speed.

This Service Manual, therefore, describes only the different points from the AR-M350U/M350N and supplementary items. For items which are not described in this Service Manual, refer to the following Service Manuals and Parts Guides.

•AR-M350/M450	Service Manual : 00ZARM350/A1E	Parts Guide: 00ZARM450/P1E	Circuit Diagram : 00ZARM350/C1/
•AR-P350/P450	Service Manual : 00ZARP350/A2E	Parts Guide: 00ZAR350LPP1/	Circuit Diagram : 00ZARP350/C1/
•AR-M350U/N•AR-M450U/N	Service Manual : 00ZARM350UA1E		
•AR-NC5J	Service Manual: 00ZARNC5J/A1E		

Note: Depending on the option, additional service documentation may be required.

^{*1:} Installation of the AR-P14 on U-series machines provides functions equivalent to the M-series machines.

Parts marked with "__" are important for maintaining the safety of the machine.

To maintain the safety and performance of the machine, use only the replacement parts specified.

(2) Engine speed

Paper size	AR-M280U/N
A4, 8.5" x 11"	28ppm
A5R/5.5" x 8.5"R	28ppm
B5	28ppm
B4/8.5" x 14	16ppm
A3/11" x 17"	14ppm

(3) Engine composition

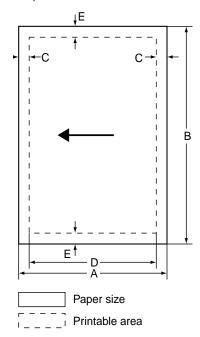

Photoconductor type	OPC (diameter of photoconductor : ø30mm)						
Record method	Electrophotograph (laser)						
Development method	Dry-type dual-component magnetic brush						
	development						
Charge method	Charged saw-tooth method						
Transfer method	Transfer roller						
Cleaning method	Cleaner blade						
Fusing method	Heat roller						
Used toner disposal	Toner recycling system						

(4) Engine resolution

Resolution	Write :600dpi
Smoothing	Write :1200dpi equivalent
Gradation	Write :2 levels

(5) Printable area

The print area of this product is shown below.

If a printer driver for Windows or Macintosh is used for printing, the printable area will be smaller. The actual printable area depends on the printer driver to be used.

B. Expanded RAM

Installation of additional RAM will provide the following:

- 1) Time out error reduction
- 2) Spool time reduction
- 3) Avoidance of Virtual Memory (VM) error / memory full

Use commercially available RAM with the following specifications.

Note: If RAM used does not meet the follow specifications, the copier may not recognize the additional RAM or its capacity correctly.

2. Production number identification

A. Drum cartridge

The lot number, printed on the front side flange, is composed of 10 digits, each digit showing the following content:

1	2	3	4	5	6	7	8	9	10

- 1 Number
 - For this model, this digit is 2.
- 2 Alphabet

Indicates the model conformity code. S for this model. (100K/80K drum)

- 3 Number
 - Indicates the end digit of the production year.
- 4 Number or X, Y, Z
 - Indicates the production month.
 - X stands for October, Y November, and Z December.
- 5/6 Number
 - Indicates the production day on the month.
- 7 Number or X, Y, Z
 - Indicates the month of packing.
 - X stands for October, Y November, and Z December.
- 8/9 Number
 - Indicates the day of the month of packing.
- 10 Alphabet
 - Indicates the production factory. "A" for Nara Plant.

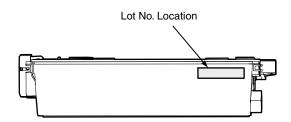

B. Toner cartridge

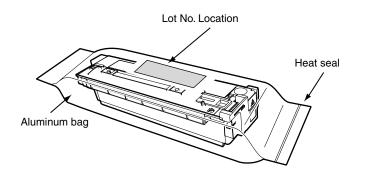

The lot number is composed of 7 digits, and each digit indicates as following.

The lot number shall is printed in the position shown below.

1 2 3	4 5	6	7
-------	-----	---	---

- 1 Version number (A sequentially revised)
- 2 Numeral figure
- Indicates the end digit of the production year.
- 3 Alphabet
 - Indicates the production factory. (B for SOCC)
- 4 Destination code
- 5,6 Numeral figures
 - Indicates the production day.
- 7 Numeral figure or X, Y, Z
 - Indicates the production month.
 - X stands for October, Y November, and Z December.

C. Developer

The lot number is composed of 8 digit, and each digit indicates as following.

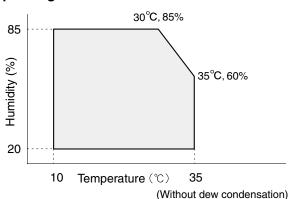

The lot number shall be printed on the bag.

1 2 3	4 5	6 7	8
-------	-----	-----	---

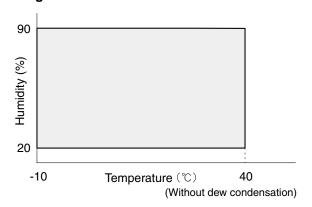

- 1 Alphabet
 - Indicates the production factory.
- 2 Figure
- Indicates the production year.
- 3/4 Figure
 - Indicates the production month.
- 5/6 Figure
- Indicates the production day.
- 7 Hyphenation
- 8 Figure
 - Indicates the production lot.

[6] UNPACKING AND INSTALLATION

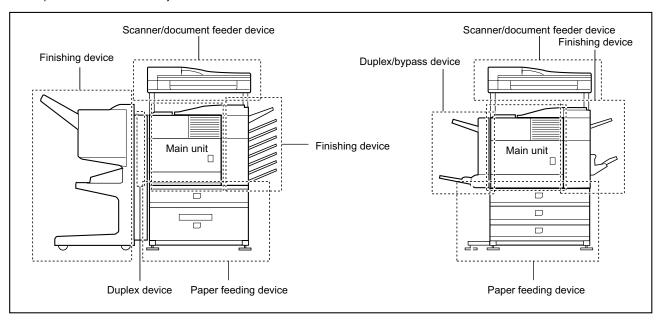

1. Installing procedure flowchart

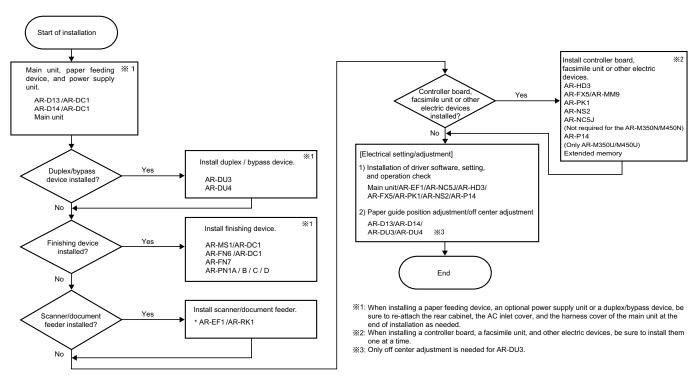

There are many combinations between this machine and option units. For installing option units, observe the following procedures for efficiency.

To install the devices efficiently, follow the procedure below.

Some peripheral devices may have been installed as standard devices depending on the main unit model.

Part of descriptions and illustrations may be different.

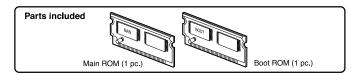

* When installing an option, refer to the Service Manual for that option and or the AR-M350 / M450 Service Manual.

2. AR-P14 installing procedure

<Before installation>

- This installation procedure is provided for use with the AR-M280U / M280N and AR-M350U / M450U series.
- * To connect this machine to a network, a Print Server Card (NIC) AR-NC5J must be installed to the multi-function controller board in advance.

* To enable the printer expansion function, the product key must be acquired.

The application number, machine serial number, and product key number are important information.

Keep the above information for future reference.

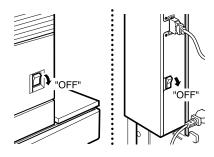

1) Mount the printer expansion kit ROMs to the control PWB.

<1>Turn off the main switch of the main unit of the printer

Turn the main switch located on the front side of the main unit to the "OFF" position.

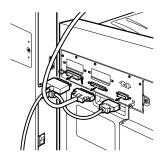

If the machine is equipped with a facsimile unit, also turn off the FAX power switch.

Then remove the power plug from the outlet.

<2>Remove the cables connected to the control PWB unit.

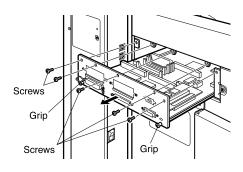

Remove all the cables connected to the control PWB unit of the main unit of the printer.

<3>Remove the control PWB unit.

Remove the five screws that fix the control PWB unit to the main unit of the printer.

Then, hold the two grips and pull out the control PWB unit to remove it from the main unit.

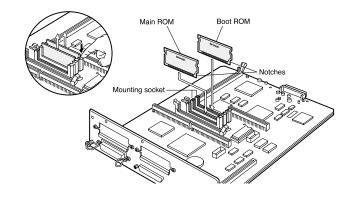

<4>Mount the printer expansion kit ROMs(2 pcs.)to the control PWB.

Remove the ROMs(main and boot ROMs)from the control PWB and replace them with the two ROMs(main and boot ROMs)of the printer expansion kit.

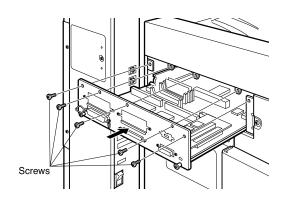

The main and boot ROMs are indicated with "MAIN" and "BOOT" on the labels on the ROMs respectively.

When mounting the printer expansion kit ROMs, insert them to the same positions in the same direction as those before replacement and ensure that the inserted printer expansion kit ROMs are locked with the fittings of the sockets.

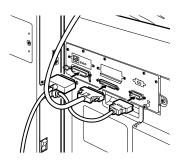

<5>Re-attach the control PWB.

Attach the control PWB to the main unit of the printer and fix it using five screws.

<6>Connect the cables to the control PWB.

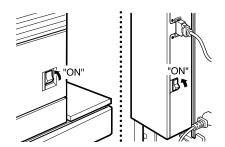

Connect all the cables that have been removed in <2> to the original positions of the control PWB unit.

If another peripheral device must be installed, carry out the following steps at the end of the installation work.

2) Turn on the main switch of the main unit of the printer. Insert the power plug of the main unit of the printer to the outlet. Then, turn the main switch located on the front side of the main unit to the "ON" position.

If the machine is equipped with a facsimile unit, turn on the FAX power switch.

3) Prepare to enable the printer expansion function.

To enable the printer expansion function, use the keys on the operation panel to enter the product key.

For entry of the product key, see the key operator's guide of the operation manual for the main unit.

Carry out the network setting for the Print Server Card.

Use a key operator program to carry out the network setting for this machine. For this network setting, the customer's network environment must be checked. Consult the network administrator to carry out the setting.

In addition to the network setting for this machine, to use the machine in the network environment:

According to the customer's network environment, install the driver software from the CD-ROM supplied with this machine and use the utility software supplied with the Print Server Card to set the network printer for the server computer.

For installation in the server computer and network setting, see the operation manual supplied with the main unit.

This setting must be carried out by the network administrator or based on consultation with the network administrator.

4) To check the operation of the printer expansion function.

When the network settings and the driver settings are complete, perform a test print to check if printing can be performed successfully.

(When test printing is completed successfully, use the "list print" key operator program to print the network settings and keep the printout for future reference.)

Installation of AR-P14 is now complete.

[7] MAINTENANCE

1. Self print of set values

Use SIM 22-6 to print the set values (machine settings) and jam history.

These values must be printed before execution of maintenance or disassembly procedures.

2. Maintenance System Table

The maintenance items and positions are the same as those of the AR-M350 series. However, the maintenance cycle differs.

[8] ADJUSTMENTS

1. Process section

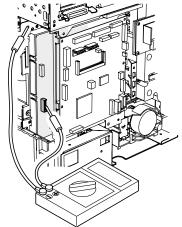

A. High voltage output adjustment

(1) Developing bias output check and setup

- Remove the rear cabinet to allow checking of the high voltage monitor output pin.
- Execute the simulation of the target high voltage. (See the table below.)
- 3) Select the mode to be set with 10-key, and press START key.
- Enter the set value with 10-key and press START key. The set value is outputted for 30 sec.
- Apply a high voltage tester between the measurement pin and the frame.

Note: Take care not to short the measuring pin to the frame.

2. Engine section

A. Resist quantity setup

•This adjustment requires a high level of accuracy. We recommend using the default setting.

This adjustment is performed in the following cases:

- •When the void quantity is changed by the paper feed tray.
- •When paper is skewed.

Complete the following adjustments before performing resist quantity setup.

- •LSU right angle adjustment
- Print magnification ratio adjustment
- •Print off-center setup
- •Void area setup

- 1) Execute SIM 51-2.
- 2) Adjust the resist quantity so that paper transport is stable.

Purpose	Adjustment, setup, operation data output, check (display)
Function (Content)	Used to check the result (main charger grid voltage developing bias voltage, laser power, etc.) of correction (process correction) in the
	image forming section. (By this simulation, the correction operation can be checked.)
Section	Process (OPC drum, developing, transfer, cleaning)
Item	Data
Operation/Procedure	The process correction value is checked.

Purpose	Adjustment	
Function (Content)	Used to adjust the contact pressure of paper on	
	the resist roller in each section (machine paper	
	feed, duplex paper feed, SPF paper feed).	
	(This adjustment is required when the print	
	image position varies or when paper jam occur	
	frequently.)	
Section	Paper transport	
	(paper exit, switchback, transport)	
Item	Operation	
Operation/Procedure	Perform the resist quantity adjustment.	
	1) The current set value is highlighted on the	
	right of each item. In this screen, be sure to	
	select "1: COPY START." (Set value: 1)	
	Enter the correction value with 10 digit key pad.	
	Press P to store the set value.	
	3) When the value is increased by 1, the resist quantity is changed by 1ms.	
	4) Press START to start copying and store the set value. (Display value: 1)	
	5) Select a paper feed tray. (Set value 2)

The AR-M280N/M280U Parts Guide describes only the parts change from AR-P350/AR-P450 Parts Guide. for the common parts, please refer to the AR-P350/AR-P450(CODE :00ZAR350LPP1/) Parts Guide.

DEFINITION

The definition of each Rank is as follows and also noted in the list

- A: Parts necessary to be stocked as High usage parts.
- B: Parts necessary to be stocked as Standard usage parts.
- C: Low usage parts.
- D: Parts necessary for refurbish.
- E: Unit parts recommended to be stocked for efficient after sales service.

Please note that the lead time for the said parts may be longer than normal parts.

S: Consumable parts.

Please note that the following parts used in Copier under the same description are classified into A or B Rank depending upon the place used.

Example: Gear made of Metal, Sprocket, Bearing, Belt made of Rubber, Spring clutch mechanism.

ARank: The parts which may be with the revolution or loading.

BRank: Parts similar to A Rank parts, but are not included in Rank A.

Because parts marked with "A" is indispensable for the machine safety maintenance and operation, it must be replaced with the parts specific to the product specification.

- Other than this Parts Guide, please refer to documents Service Manual (including Circuit Diagram) of this model.
- O Please use the 13 digit code described in the right hand corner of front cover of the document, when you place an order.
- O For U.S. only-Use order codes provided in advertising literature. Do not order from parts department.

CAUTION FOR BATTERY REPLACEMENT

(Danish)

ADVARSEL!

Lithiumbatteri – Eksplosionsfare ved fejlagtig håndtering. Udskiftning må kun ske med batteri af samme fabrikat og type. Levér det brugte batteri tilbage til leverandoren.

(English)

Caution!

Danger of explosion if battery is incorrectly replaced.
Replace only with the same or equivalent type
recommended by the manufacturer.

Dispose of used batteries according to manufacturer's instructions.

(Finnish)

VAROITUS

Paristo voi räjähtää, jos se on virheellisesti asennettu. Vaihda paristo ainoastaan laitevalmistajan suosittelemaan tyyppiin. Hävitä käytetty paristo valmistajan ohjeiden mukaisesti.

(French)

ATTENTION

Il y a danger d'explosion s' il y a remplacement incorrect de la batterie. Remplacer uniquement avec une batterie du même type ou d'un type équivalent recommandé par le constructeur.

Mettre au rebut les batteries usagées conformément aux instructions du fabricant.

(Swedish)

VARNING

Explosionsfara vid felaktigt batteribyte. Använd samma batterityp eller en ekvivalent typ som rekommenderas av apparattillverkaren. Kassera använt batteri enligt fabrikantens instruktion.

(German)

Achtung

Explosionsgefahr bei Verwendung inkorrekter Batterien.
Als Ersatzbatterien dürfen nur Batterien vom gleichen Typ oder
vom Hersteller empfohlene Batterien verwendet werden.
Entsorgung der gebrauchten Batterien nur nach den vom
Hersteller angegebenen Anweisungen.

CAUTION FOR BATTERY DISPOSAL

(For USA, CANADA)

Contains lithium-ion battery. Must be disposed of properly.
Remove the battery from the product and contact
federal or state environmental
agencies for information on recycling and disposal options.

AR-M350U/M450U MODEL AR-M350N/M450N

OPTIONS AR-P14

[1] INTRODUCTION

The AR-M350U/M450U and AR-M350N/M450N are minor change models based on the AR-M350/M450.

This service manual only provides information on these minor changes.

In addition to this service manual, the documents listed below are required to properly maintain these machines.

•AR-M350/M450	Service Manual : 00ZARM350/A1E	Parts Guide: 00ZARM450/P1E	Circuit Diagram : 00ZARM350/C1/
•AR-P350/P450	Service Manual: 00ZARP350/A2E	Parts Guide: 00ZAR350LPP1/	Circuit Diagram: 00ZARP350/C1/
•AR-NC5J	Service Manual : 00ZARNC5J/A1E		

Note: Depending on the option, additional service documentation may be required.

^{*1:} Installation of the AR-P14 on the AR-M350U/M450U will provide similar functionality to that of the AR-M350/M450.

Parts marked with "\hat{\!\"}" are important for maintaining the safety of the set.

Be sure to replace these parts with specified ones for maintaining the safety and performance of the set.

B. Expanded RAM

Installation of an expanded RAM will avoid the following status.

- 1) Time out error reduction
- 2) Spool time reduction
- 3) Avoidance of VM error / memory full

Use commercially available RAM with the following specifications.

Note: If RAM used does not meet the follow specifications, the copier may not recognize the additional RAM or its capacity correctly.

2.Production number identification

A. Drum cartridge

The lot number, printed on the front side flange, is composed of 10 digits, each digit showing the following content:

1 2 3	4	5 6	7	8	9	10
-------	---	-----	---	---	---	----

1 Number

For this model, this digit is 2.

2 Alphabet

Indicates the model conformity code. T for this model.

3 Number

Indicates the end digit of the production year.

4 Number or X, Y, Z

Indicates the production month.

X stands for October, Y November, and Z December.

5/6 Number

Indicates the production day on the month.

7 Number or X, Y, Z

Indicates the month of packing.

X stands for October, Y November, and Z December.

8/9 Number

Indicates the day of the month of packing.

10 Alphabet

Indicates the production factory. "A" for Nara Plant.

B. Toner cartridge

The lot number is composed of 7 digits, and each digit indicates as following.

The lot number shall is printed in the position shown below.

1	2	3	1	5	6	7
		3	4	5	U	<i>'</i>

- 1 Version number (A sequentially revised)
- 2 Numeral figure

Indicates the end digit of the production year.

3 Alphabet

Indicates the production factory. (B for SOCC)

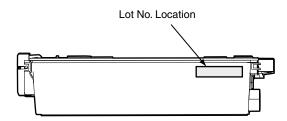

- 4 Destination code
- 5,6 Numeral figures

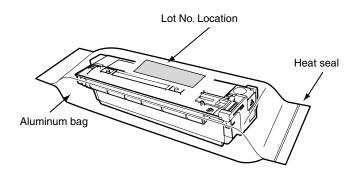

Indicates the production day.

7 Numeral figure or X, Y, Z

Indicates the production month.

 \boldsymbol{X} stands for October, \boldsymbol{Y} November, and \boldsymbol{Z} December.

C. Developer

The lot number is composed of 8 digit, and each digit indicates as following.

The lot number shall be printed on the bag.

1	2	3	4	5	6	7	8

1 Alphabet

Indicates the production factory.

2 Figure

Indicates the production year.

3/4 Figure

Indicates the production month.

5/6 Figure

Figure

Indicates the production day.

[6] UNPACKING AND INSTALLATION

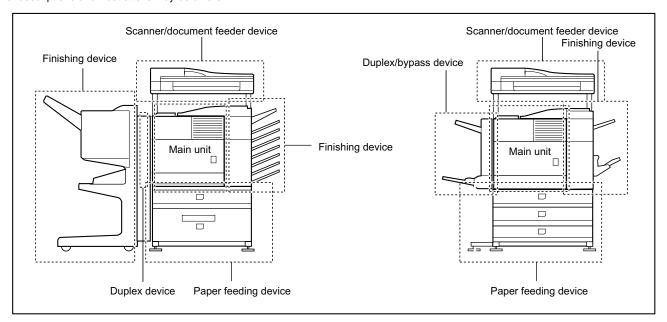

1. Installing procedure flowchart

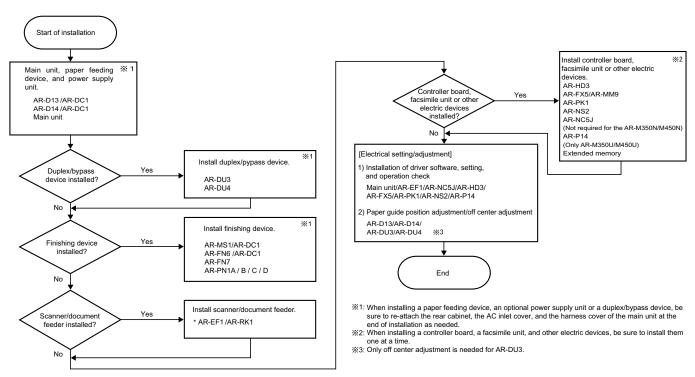

There are many combinations between this machine and option units. For installing option units, observe the following procedures for efficiency.

To install the devices efficiently, follow the procedure below.

Some peripheral devices may have been installed as standard devices depending on the main unit model.

Part of descriptions and illustrations may be different.

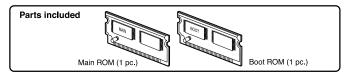

* When installing an option, refer to the Service Manual for that option and or the AR-M350 / M450 Service Manual.

2. AR-P14 installing procedure

<Before installation>

- This installation procedure is provided for use with the AR-M350U/ M450U series.
- * To connect this machine to a network, a Print Server Card (NIC) AR-NC5J must be installed to the multi-function controller board in advance.

 To enable the printer expansion function, the product key must be acquired.

The application number, machine serial number, and product key number are important information.

Keep the above information for future reference.

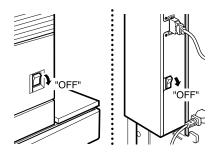

1) Mount the printer expantion kit ROMs to the control PWB.

<1>Turn off the main switch of the main unit of the printer

Turn the main switch located on the front side of the main unit to the "OFF" position.

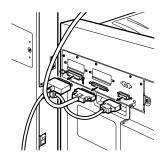

If the machine is equipped with a facsimile unit, also turn off the FAX power switch.

Then remove the power plug from the outlet.

<2>Remove the cables connected to the control PWB unit.

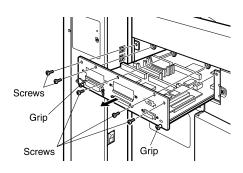

Remove all the cables connected to the control PWB unit of the main unit of the printer.

<3>Remove the control PWB unit.

Remove the five screws that fix the control PWB unit to the main unit of the printer.

Then, hold the two grips and pull out the control PWB unit to remove it from the main unit.

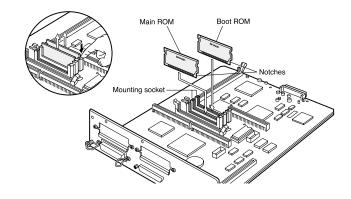

<4>Mount the printer expansion kit ROMs(2 pcs.)to the control PWB.

Remove the ROMs(main and boot ROMs)from the control PWB and replace them with the two ROMs(main and boot ROMs)of the printer expansion kit.

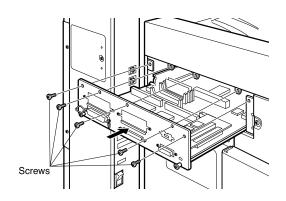

The main and boot ROMs are indicated with "MAIN" and "BOOT" on the labels on the ROMs respectively.

When mounting the printer expansion kit ROMs, insert them to the same positions in the same direction as those before replacement and ensure that the inserted printer expansion kit ROMs are locked with the fittings of the sockets.

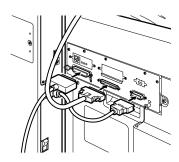

<5>Re-attach the control PWB.

Attach the control PWB to the main unit of the printer and fix it using five screws.

<6>Connect the cables to the control PWB.

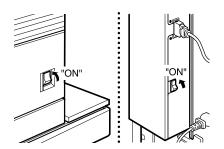

Connect all the cables that have been removed in <2> to the original positions of the control PWB unit.

If another peripheral device must be installed, carry out the following steps at the end of the installation work.

2) Turn on the main switch of the main unit of the printer. Insert the power plug of the main unit of the printer to the outlet. Then, turn the main switch located on the front side of the main unit to the "ON" position.

If the machine is equipped with a facsimile unit, turn on the FAX power switch.

3) Prepare to enable the printer expansion function.

To enable the printer expansion function, use the keys on the operation panel to enter the product key.

For entry of the product key, see the key operator's guide of the operation manual for the main unit.

Carry out the network setting for the Print Server Card.

Use a key operator program to carry out the network setting for this machine. For this network setting, the customer's network environment must be checked. Consult the network administrator to carry out the setting.

In addition to the network setting for this machine, to use the machine in the network environment:

According to the customer's network environment, install the driver software from the CD-ROM supplied with this machine and use the utility software supplied with the Print Server Card to set the network printer for the server computer.

For installation in the server computer and network setting, see the operation manual supplied with the main unit.

This setting must be carried out by the network administrator or based on consultation with the network administrator.

4) To check the operation of the printer expansion function.

When the network settings and the driver settings are complete, perform a test print to check if printing can be performed successfully.

(When test printing is completed successfully, use the "list print" key operator program to print the network settings and keep the printout for future reference.)

Installation of AR-P14 is now complete.

[7] MAINTENANCE

1. Self print of set values

Use SIM 22-6 to print the set values (machine settings) and jam history.

These values must be printed before execution of maintenance or disassembly procedures.

2. Maintenance System Table

CAUTION FOR BATTERY REPLACEMENT

(Danish)

ADVARSEL!

Lithiumbatteri – Eksplosionsfare ved fejlagtig håndtering. Udskiftning må kun ske med batteri af samme fabrikat og type. Levér det brugte batteri tilbage til leverandoren.

(English)

Caution!

Danger of explosion if battery is incorrectly replaced.
Replace only with the same or equivalent type
recommended by the manufacturer.

Dispose of used batteries according to manufacturer's instructions.

(Finnish)

VAROITUS

Paristo voi räjähtää, jos se on virheellisesti asennettu. Vaihda paristo ainoastaan laitevalmistajan suosittelemaan tyyppiin. Hävitä käytetty paristo valmistajan ohjeiden mukaisesti.

(French)

ATTENTION

Il y a danger d'explosion s' il y a remplacement incorrect de la batterie. Remplacer uniquement avec une batterie du même type ou d'un type équivalent recommandé par le constructeur.

Mettre au rebut les batteries usagées conformément aux instructions du fabricant.

(Swedish)
